

Aspect led MEC for EDUCATION

Typical hands-on scenarios covered are:

Starting your day

Effectively connect with students, teachers, and faculty; manage personal and school-related calendars, email, and documents from almost anywhere and virtually any device.

Stay organized

Streamline your communications through intuitive apps that you can access directly from your favorite productivity tools with robust security.

Collaborate across teams

Experience rich collaboration and communication that brings people together through a variety of new enterprise-ready social tools and empowers them to work together to make better decisions.

Investigate data

Analyze rich student operational data sets to identify trends and performance and scale them across academic departments— all with current Microsoft technology.

Work from anywhere

Create and share content in the classroom and across boundaries and devices¹.

How to participate

Please contact your Aspect account representative or aspectmps@aspect.com to schedule a Microsoft Experience Center for Education session.

Windows 8 and the new Office are here. Experience what's possible.

A Microsoft Experience Center for Education session is a hands-on introduction to Windows 8 and the new Office that gives you an opportunity to experience these powerful new productivity solutions first hand.

This session for educators is not a generic demo. It is a true-to-life user experience that takes you through common education-related scenarios. These include: working remotely, leveraging social networking to locate expertise and share information, and connecting in real time with students, teachers, and faculty. This session also gives you a first-hand look at the fast and fluid experience of Windows 8 and the exciting features of the new Office across a variety of devices, including tablets, PCs, and smartphones¹.

Why should you come to a Microsoft Experience Center for Education session?

Participating in a session is the best way to learn about productivity tools and technologies without sales pressure. Sessions are led by a trained facilitator and are designed to be interactive, experiential, and fun. Attend a session and explore how Windows 8 and the new Office can help you save time and be more productive.

Attending a session will give you the opportunity to experience these aspects of Windows 8 and the new Office:

Devices

Explore a streamlined user experience across tablets, PCs, and smartphones¹.

Cloud

Discover a personalized experience that goes where you go, with Office apps and anywhere access to documents.

Social

Use enterprise social tools to get work done using microblogs, newsfeeds, and the ability to follow people, share documents and sites.

Control

Learn how you can help keep your school safe by protecting sensitive information. The new Office is designed to meet privacy and security regulatory compliance requirements.
